

Editorial

Higher education aims to impart quality education, and research is essential to ensuring and enhancing that quality. Teachers in higher education are expected to engage actively in research and related academic activities, as they carry significant responsibilities toward society. In the modern educational landscape, research has become indispensable for the development of new ideas, the advancement of knowledge, and the creation of an intellectual environment. At the same time, teachers face the challenge of making education value-based in today's rapidly changing world.

The faculty members of Dikhowmukh College are deeply conscious of the responsibilities they must shoulder in this evolving educational scenario. They have continuously adapted themselves to the dynamic global society and have been sincerely striving to make the college a centre of excellence in the greater Dikhowmukh region as well as in Assam. Since research is a quintessential component in fostering an intellectual environment within an academic institution, the Dikhowmukh College Publication Cell has endeavoured to provide a platform for all stakeholders and research enthusiasts to publish their authentic research papers through this Research Journal.

We hope that this volume of the Research Journal will assist academicians and scholars in carrying out research in their respective fields of interest. Editing a research journal is never an easy task, and in this regard, we express our sincere gratitude to everyone whose support made the publication of this edition possible. We offer our heartfelt thanks to Dr. Ranjit Kumar Boruah, Principal of Dikhowmukh College for his constant guidance and support. We are also grateful to all the members of the Editorial Board for diligently discharging the responsibilities entrusted to them. Our appreciation also extends to all the contributors who responded to our requests from time to time and provided the necessary support for the successful publication of this journal.
