About the College

Dikhowmukh College is situated about 5 k.m. away from the National Highway No. 37 through the terminus of Gaurisagar, by the side of historic Bor Ali. A few kilometers ahead of the college is the confluence of the rivers Dikhow, Goriaian and Brahmaputra (Dikhowmukh) - a popular picnic spot and also the seat of religious unity, in the form of the famed Ajan Peer Dargah and Ramkha Peeth. The 'Moglow' Tank in the heart of the college campus, now preserved as Turtle Preservation Centre, resurrects the glorious saga of the Manipuri Princess Kuranganayani who became a queen of the Ahom king Raieswar Singha. The huge eco-friendly college campus with its serene surroundings ensures an ideal academic atmosphere.

Workshop on Quantitative Techniques for Economics

A CORRESPONDENT
GAURISAGAR, March 31: Dikhowmukh College in Sivasagar organized a three-day-long ICSSR-sponsored workshop under the joint aegis of college IQAC on "Quantitative Techniques for Economics". The workshop was organized with a view to provide in-depth knowledge in fundamental statistical techniques used in economic research, and acquaint with computer software in research.

The program was formally inaugurated by Dr. P. B. Barua, Principal, Dikhowmukh College, who presided over the inauguration. Dr. Barua, who is also a faculty member of the college, expressed his gratitude for making the workshop successful. Earlier, Dr. Barua had addressed the students and faculty members of the college, emphasizing the importance of quantitative techniques in economic research.

In the inaugural function, Dr. Barua also mentioned that the workshop was organized in collaboration with the IQAC, Dikhowmukh College, and the ICSSR, New Delhi. He also mentioned that the workshop was organized in collaboration with the IQAC, Dikhowmukh College, and the ICSSR, New Delhi.

About the Workshop

Published findings, as well as personal experience, suggest that developing and maintaining undergraduate research benefits the students, the faculty mentors, the university or institution, and eventually society at large. Additionally, the scientific community places increasing importance on research performed at primarily undergraduate institutions. Since 1978, the Council on Undergraduate Research has promoted research opportunities for faculty and students at predominantly undergraduate institutions. Moreover, NEP 2020 gives special emphasis on research for the students under FYUGP. Our belief is that an exercise science curriculum provides students the opportunity to become responsible professionals of competence and integrity in the area of health and human performance. The components necessary for professional competency in exercise-related fields include an understanding of the basic concepts and literature in the health-related specialty that is being studied and knowledge of the terminology or technical language used professionally. Incorporation of research methodology and the hypothesis-driven scientific process can build on this foundation through the development of independent critical thinking skills as well as oral and written communication skills. Independent thinking can instill in the undergraduate student the confidence to form one's own conclusion based on available evidence. Undergraduate students who took classes in the same department where the research projects occurred reported having increased independence of thought, a more intrinsic motivation to learn, and a more active role in learning. Thus, the research process has a very favorable impact on valuable learning objectives as undergraduates prepare for their respective professions.

Basic Aspects to be covered in the workshop are

- ▶▶ Fundamentals of Research
- ▶▶ Types & source of data and methods of data collection
- ▶▶ Process of data entry in excel/SPSS and
- ▶▶ Methods of data analysis (descriptive statistical tools and statistical test used in research)
- ▶▶ Report/Dissertation writing
- ▶▶ Use of AI in research & Research Ethics

Who can participate ?

1. Students of FYUGP
2. Students of FYMP and PG students.
3. Research Scholars
4. Faculties
